

Features | Technology | Extras

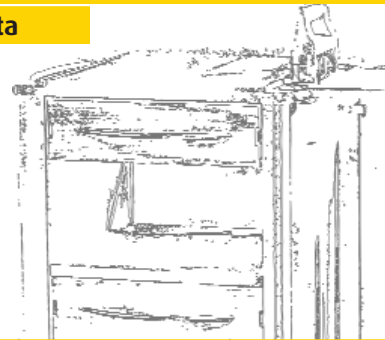

Bedside table

- Easy to operate using one hand.
- Height adjustment with pneumatic spring support, can be swivelled into reading position and automatically locks into place.

Handles | Castors

- Convenient handling thanks to ergonomic handle concept. Smooth, lockable double castors, ø 75 mm, preventing turning or swivelling. The NK-600 stands firm.

Technical data

Bedside table	SERIES 80
Carcass	
• Height	approx. 87 cm
• Width	approx. 66 cm
• Depth	approx. 53 cm
Total width	approx. 118 cm (with extended panel)
Bedside table panel	approx. 58 x 36 cm
Height adjustment	approx. 80-116 cm
Weight	approx. 41 kg

Stability

- Complies with maximum requirements; implementation of counterweights ensures stability even under heavy loads.

Accessories

- Easily accessible, variable-position wire baskets for a variety of applications, e.g. for storing small items.
- Fixture for accommodating kidney-shaped bowls.
- Lockable top drawer (master locking system possible).
- Telephone holder.
- In short: the NK-600 is extremely robust and stable for everyday care requirements, and can be equipped variably with practical accessories for the individual requirements of care personnel; available in a variety of colours and designs for harmonious integration into the room environment.

Materials | Design

- Carcass in metal framework construction with bordering.
- Top panel and bedside panel with drip protection edge; drawer fronts and side sections made of durable, easy-to-clean high-pressure laminated sheet material (HPL).
- Segmental arch drawer handles made of metal.
- Plastic drawer guides with integrated central stop and limit stops.
- Fixture for telephone, emergency call systems and other medical equipment.

Details

Additional technical information available on request.

• Stability to loads of 12 kg on the bedside table panel.

• Integrated fridge with a gross capacity of 31 litres

• Variable wire baskets.

• **Quality: Made in Germany!** Our company is certified to DIN EN ISO 9001:2000 as well as DIN EN ISO 13485:2003 (medical products)

BEDSIDE TABLE SERIES 80

“My idea is that our furniture makes our customers’ lives easier. And better.”

[Frank H., design consultant at Mauser

Bedside tables from Mauser Care are eminently suitable for everyday applications in the hospital. Because even the early development phase involves consideration of how to combine functionality and ergonomics – resulting in particularly variable solutions. And because we respect the fact that patients not only read in bed but also eat and drink, our bedside tables have particularly easy-care panels.

Now, isn't that intelligent?

Tried-and-tested bedside table system

SERIES 80 - a modular system for a wide variety of applications

The innovative SERIES 80 bedside table system was developed in cooperation with users in order to comply with the wide variety of tasks associated with the area of care, whereby focus was given to the idea that care personnel often have a heavy load to bear. This meant that a system needed to be developed where

ergonomic and convenient handling had absolute priority. This has been achieved in the form of the SERIES 80 system. Apart from exemplary handling, it is also distinguished by its modular extensibility qualifying it for a wide variety of tasks, not to mention its innovative design and variable colour options.

Features

Multifunctionality in detail

At first glance, an attractive bedside table. But a closer look reveals a well-conceived system consistently aligned towards the requirements of the respective user.

Drawers

Can be used from both sides. Drawers with removable easy-care plastic inserts.

Modular drawer concept

NK 81

- **Two drawers, one open compartment**
 - Drawer 1 at top (110 mm deep).
 - Open compartment in the centre (195 mm deep).
 - Drawer 2 at bottom (380 mm deep) with removable plastic insert and plastic bottle holder.

NK 82

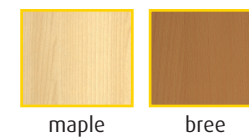

- **Three drawers**
 - Drawer 1 at top (110 mm deep).
 - Drawer 2 in the centre (210 mm deep).
 - Drawer 3 at bottom (380 mm deep) with removable plastic insert and plastic bottle holder (not illustrated here).

NK 83

- **One drawer, one fridge**
 - Drawer at top (110 mm deep).
 - Fridge in bottom section with a gross capacity of 31 litres; door hinge on left or right; automatic defrosting feature.
